europe

In a medical emergency

Do NOT give these medications to people with Parkinson's.

- Anti-sickness medicines such as Metoclopramide, Cyclizine, Prochlorperazine. If an antiemetic is necessary, domperidone should be used.
- Antipsychotics haloperidol should not be used and Quetiapine is the drug of choice. Other Atypical antipsychotics (e.g. Risperidone, Olanzapine) may be considered if Quetiapine is not tolerated.
- **Painkillers** Pethidine and other opioids should not be used at the same time as selegiline and rasagiline.

Surgery or general anaesthesia for those with pump infusions

Duodopa pump infusion treatment may be continued for as long as it's permitted to take fluids and medicines by mouth. It may be switched off during surgery.

Apomorphine pump infusion treatment may be

continued before , during and after surgery.
